The Center for Embedded Computer Systems at the University of California, Irvine (http://www.cecs.uci.edu) is seeking a part-time Junior Specialist position in the area of parallel SystemC simulation on many-core computer architectures. The candidate will participate in research projects involving system-level modeling, synthesis, verification and development of an environment for modeling embedded systems. Desired features include a strong systems building and C/C++ background; experience with embedded and real-time systems, control systems, FPGAs, microcontrollers, and Linux/Unix; and an established publication record. Applicants must have a Master degree in Computer Science or Computer Engineering, with an emphasis on embedded systems research. The salary will be commensurate with training and experience.

Interested applicants should send a curriculum vitae to Professor Rainer Dömer at doemer@uci.edu and copy Grace Wu at gracewu@uci.edu.

The University of California, Irvine is an equal opportunity employer committed to excellence through diversity.
